

QARC ATC Year 11 Plans

15 April 2009

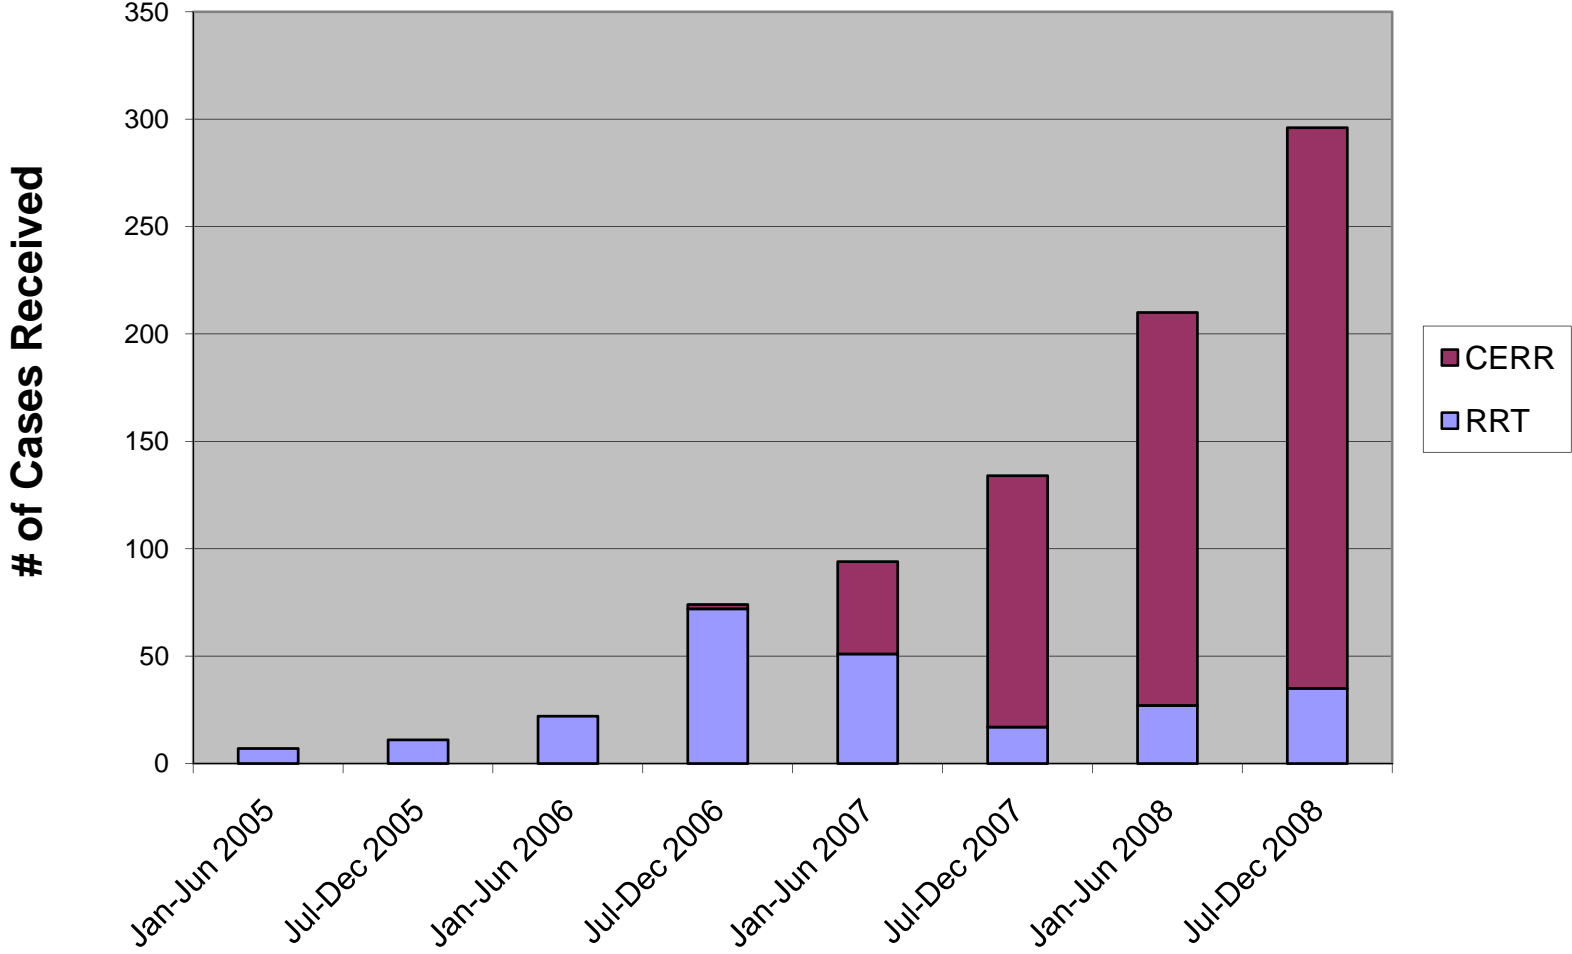

Year 10 Plans - Credentialing

- Web-based facility information form that is common for all the QA groups to include key personnel and contact information that the sites themselves could keep updated
 - Status: under development
- Development of IGRT guidelines, forms, and credentialing that will be accepted by all groups and QA centers for participation in protocols requiring, or allowing, IGRT
 - Status: in progress
- Continue collaboration with RPC on proton credentialing

Year 10 Plans – Digital Data

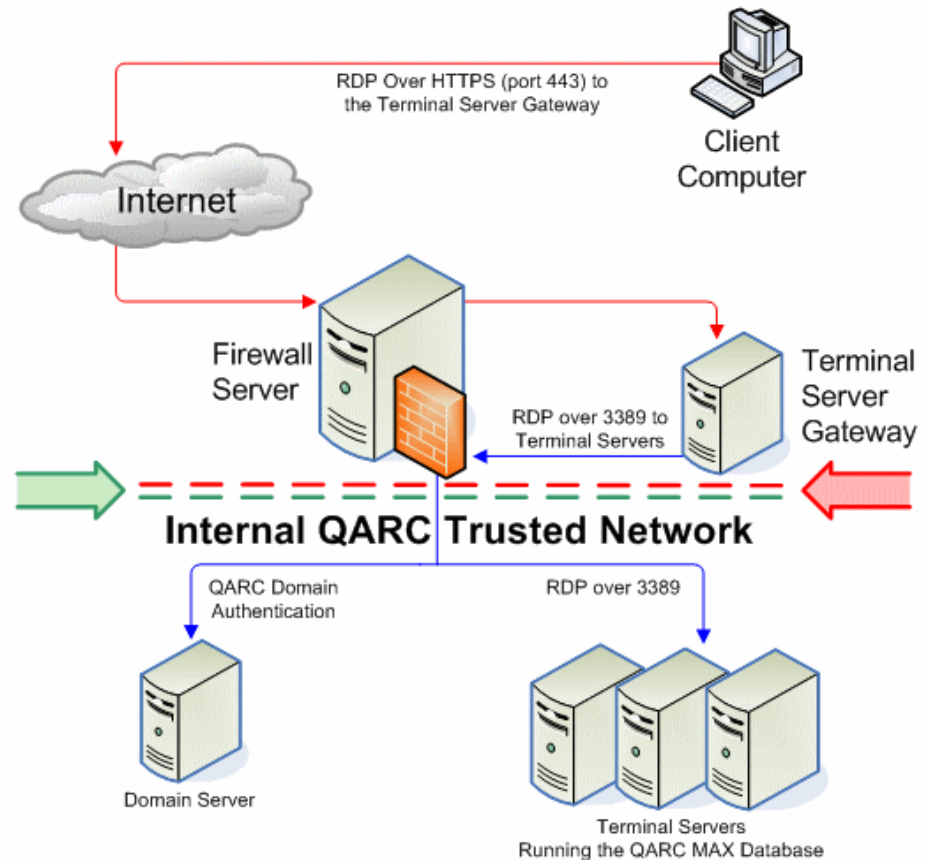

- Anticipate increased volume of digital data
 - Status: Volume of digital data is continuing to increase.
- Validation of CERR
 - Status: In progress. CERR will be validated as third party software for the functionality that we are using. Our deadline for completing the validation is June of this year.

QARC Digital RT Data

Year 10 Plans – Remote Review

- Develop/implement web-based review
Status: currently operational using terminal server approach

QARC Network Access Diagram – Remote Internet Desktop Users access QARC MAX Database using standard HTTPS to the Terminal Server Gateway (TSG). TSG communicates with Internal Terminal Servers via RDP 3389.
