

QARC-ATC Year 11 Plans

ATC Meeting Philadelphia, PA, Oct 27, 2009

- Credentialing
- Digital Data/ Remote Review
- Other Pertinent Initiatives

QARC-ATC Year 11 Plans

Credentialing:

- Development of a web-based facility information database, housed at RPC, that is common for all cooperative groups and which can be updated by the institutions themselves
- Finalizing IMRT guidelines that are accepted by all cooperative groups for one-time credentialing of institutions, including non- North American centers
- Finalizing IGRT guidelines, forms and credentialing that are accepted by all cooperative groups for one-time credentialing of institutions, including non-North American centers
- Developing guidelines for credentialing of motion management that are acceptable to all cooperative groups for one-time credentialing of institutions, including non- North American centers
- Harmonization with other QA centers on criteria for re-credentialing

QARC-ATC Year 11 Plans

Digital Data/Remote Review

- Transition in new protocols from optional to required digital data submission of treatment plans
- Improved user interface for web-based review, which will be offered to other QA centers
- Increased distribution of and implementation of web-based review
- Continued modifications to CERR as needed for QARC requirements, to be shared with ATC if desired

QARC-ATC Year 11 Plans

Other Initiatives

- Participate in promoting VIEW aims within the ATC
- Participate in caBIG In Vivo Imaging Workspace
 - Actively support RT treatment plans as a test Use case
