

Update: TLD Audit Frequency Study

- Conference call 8/24/09 decided a great deal
 - Details of the study worked out
 - **GLITCH – Will EORTC participate in 0848 at all?**
 - Expect ~40 EORTC institutions, if they participate, with an agreement to adhere to the study for the full 5 years
 - RPC is waiting for the institutions to be identified to initiate study

Update: TLD Audit Frequency Study

- EU-QART – institution will pick the two photon beams as in the past
 - For only the beams chosen will results be shared in years 0, 2, 4, 5.
- US-QART will measure all photon energies every year
 - US-QART data will not be shared with institution except for beams needed for EU-QART
 - All other US-QART data will be stored in the RPC database and not analyzed until the end of the study

Update: TLD Audit Frequency Study

- Additional proposed hypotheses and correlative studies to the primary hypothesis regarding impact of TLD audit frequency (annual vs. biennial)
- We have communicated these past few weeks and have posed a few questions regarding the revised study as well as clarifying the proposal.
