## **ATC Tools Status Report**

	ATC Submission and OA Review System (Mothe	nd 1 - in use	2)
	ATC Submission and QA Review System (Methor Features	ou i - iii use	₹)
Dulaultu		Degreested by	Ctatus
Priority	Description	Requested by	Status Done 6/x/04
	Interim HDR import allows 3D visualization of dwell positions  Add additional isodose levels (total of 6 instead of 4 levels visible at once)	RPC	Done 8/6/03
	Retain memory of last protocol visited	RTOG	Done 8/6/03
	DVH defaults to PTV (then ETV, then GTV)	RTOG	Done 8/6/03
	Online T2 form	ITC	Done 8/6/04
	Greyscale preselect menu	QARC	Done 12/15/04
	RRT integrated with Method 1 database		Done 12/15/04
	Implement CD data import into Method 1 database	QARC	Done 12/22/04
	Allow RRT to accept scoring from reviewers	RTOG	Done 12/x/04 Done 1/x/05
	RRT disclaimer (not to be used for patient care)  Select source for DVH applet (ATC computed, institution submitted, etc.)	ITC	Done 1/x/05 Done 3/14/05
	Add a measuring tool to the RRT	RPC	Done 5/19/05
	Streamline data import and DVH calculation process	QARC	Done 6/22/05
	Establish RRT server at QARC	QARC	Done Sep 200
	Import non-supine datasets (needed for PBI and developing protocols)		Done 7/1/05
4	Move/Copy "up one slice" "down one slice" inside contouring applet	All	
	Identify cases with outstanding problems in the ITC QA database user interface	ITC	
	View more than one slice (not just thumbnails)	ITC	
	Show plan identified seeds on TIPPB plans	ITC	
	Add a margin generation tool to the RRT		
	Ecatures peoding additional specification	<u> </u>	
	Features needing additional specification		I
	Extract/export dose planes for phantom dosimetry Implement brachy plan summary	RPC Study Chair	<b> </b>
	Import HDR into Method 1 database sufficient to allow dose re-calculation	ITC	1
	Platform Independent DVH Engine	RCET	1
	Bugs	-	
Priority	Description		
	DVH has problems with small volumes (especially phantom TLDs)		Fixed 5/3/04
	Intermittent problem importing dose submitted by the Corvus treatment planning system		Fixed 8/31/04
	Implant plans using RTOG Data Exchange format not extracted properly		Fixed 10/6/04
	Implant plans with Pd103 seeds not working in FOCUS		Fixed 12/13/04
	RRT rapid refresh bug		Fixed 1/x/05
	Read non-square pixel US images (need for prostate preplan viewing in RRT)		
	TIPPB plans cannot be recalculated for Method 1 submissions		
	Intermittent problem importing contours created/modified using the RRT contouring applet		
AT	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 -	· in develop	oment)
AT	Intermittent problem importing contours created/modified using the RRT contouring applet	· in develop	oment)
	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 -	· in develop	oment) Status
	TC Submission and QA Review System (Method 2 - Features		
	C Submission and QA Review System (Method 2 - Features Description WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images		Status
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic	Requested by	Status in v.2.4 in
	C Submission and QA Review System (Method 2 - Features Description WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images	Requested by	Status in v.2.4 in
	C Submission and QA Review System (Method 2 - Features Description WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format	Requested by	Status in v.2.4 in testing
	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 -  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images  Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow  WebSys/NetSys client revision interlock	Requested by	Status in v.2.4 in testing
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG	Requested by  ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing
	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 -  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images  Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow  WebSys/NetSys client revision interlock	Requested by ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 -  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images  Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects	Requested by  ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface	Requested by  ITC ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys Client User's Manual	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC	Status in v.2.4 in testing in v.2.3
	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3
Priority	C Submission and QA Review System (Method 2 -  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow  WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects  WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  Bugs	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3 in v.2.4 in testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3 in v.2.4 in testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames.	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3 in v.2.4 in testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP)	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "study director"	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order)	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	Intermittent problem importing contours created/modified using the RRT contouring applet  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale rendering makes some images unusable.	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	Intermittent problem importing contours created/modified using the RRT contouring applet  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys Client User's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  WebSys/NetSys Server Programmer's Manual  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale controls difficult to interpret; no way to apply grayscale settings	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	Intermittent problem importing contours created/modified using the RRT contouring applet  Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale rendering makes some images unusable.	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images  Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys Client User's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director" Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale rendering makes some images unusable. Rapid Images	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	Intermittent problem importing contours created/modified using the RRT contouring applet  C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  Bugs Description  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale controls difficult to interpret; no way to apply grayscale settings to all images Rapid Image Review interface state is inconsistent (e.g., Equalize is not applied to all images)	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  WebSys/NetSys Server Programmer's Manual  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale rendering makes some images unusable.  Rapid Image Review grayscale controls difficult to interpret; no way to apply grayscale settings to all images  Rapid Image Review interface state is inconsistent (e.g., Equalize is not applied to all images)  Web-based server administration fails to delete a case record	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interfock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  Bugs  Description  WebSys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "user" and 6 protocols as "study director"  Rapid Image Review grayscale rendering makes some images unusable. Rapid Image Review grayscale controls difficult to interpret; no way to apply grayscale settings to all images Rapid Image Review interface state is inconsistent (e.g., Equalize is not applied to all images) Web-based server administration fails to delete a case record WebSys v.2.3 fails to read DICOM-conformant files for download of information objects	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	in v.2.4 in testing in v.2.4 in testing in v.2.3 in v.2.4 in testing fixed v.2.1.3b
Priority	C Submission and QA Review System (Method 2 - Features  Description  WebSys v.2 Server Software (automatic indexing/JPEG image generation for diagnostic images Rapid Image Review support for images submitted using RTOG data exchange format Improved case selector user interface in WebSys: select (or sort by) protocol, insitution, case Add review status flag to indicate state of QA process flow WebSys/NetSys client revision interlock Tool to check consistency of WebSys database with respect to submitted DICOM and RTOG objects  Web-based server administration interface Server-side validation tool for submitted RT DICOM objects WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Administrator's Manual WebSys/NetSys Server Programmer's Manual  WebSys/NetSys Server Programmer's Manual  WebSys Client file selector in DICOM upload hangs (BOSCHWR, WinXP) Websys Client file selector in RTOG crashes with non-standard filenames. Database limits user accts to 6 protocols as "study director"  Rapid Image Review applet thumbnails have incorrect Z positions (appear out of order) Rapid Image Review grayscale rendering makes some images unusable.  Rapid Image Review grayscale controls difficult to interpret; no way to apply grayscale settings to all images  Rapid Image Review interface state is inconsistent (e.g., Equalize is not applied to all images)  Web-based server administration fails to delete a case record	Requested by  ITC ITC ITC ITC ITC ITC ITC ITC ITC IT	Status in v.2.4 in testing in v.2.3  in v.2.4 in testing  fixed v.2.1.3b testing
